MEGA^f ***Individualized Scorer Scale Summary*** ***Only***

MEGA^f assesses risk for coarse sexual improprieties¹ and/or sexually abusive behaviors² in youth ages 4 to 19, be they adjudicated or non-adjudicated; and/or evaluates progress of the youth every 6 months in terms of increased or decreased risk; thus, it can be an outcome measure as well.

L.C. Miccio-Fonseca, Ph.D.

Disclaimer

*MEGA^f Individualized Risk Assessment Report is based on the premise that the individual administering the questionnaire has been trained on how to complete *MEGA^f* and abides by all the instructional set parameters in both *MEGA^f Manual* and *MEGA^f risk assessment training*.*

¹ Coarse sexual improprieties are sexually vulgar comments, expressions, and behaviors evidencing an unsophisticated awareness of psychosexual conditions, or environments, or social situations whereby the youth engages in sexual behaviors that are crude, indecent, and outside the societal norms of propriety (e.g., crude sexual gestures, sexually suggestive and/or vulgar sexual comments, mooning, looking up skirts, a young child rubbing his or her genitals in public or trying to grab another's genitals, a child looking over a stall in a public restroom).

² Sexually abusive behaviors and improprieties of these youth fall along a coercion continuum of low, moderate, high, or very high (lethal) risk; this applies to sexually abusive youth who are either adjudicated or non-adjudicated.

MEGA⁺ Individualized Scorer Scale Outcome Summary Only

Informational Section

Youth's Name: Daniella T.S. **MEGA⁺ Certification Code:** 1617

Agency/Facility place of MEGA⁺ Risk Assessment: *Clinic for the Sexualities*

Date MEGA⁺ Completed: 02/02/2013 **MEGA⁺ Official score date:** 02/21/2013

Outcome Measure: Time 2

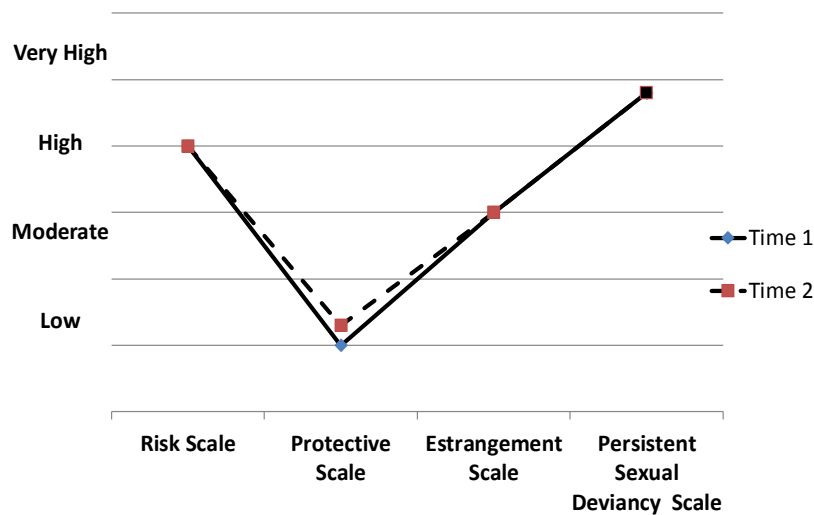

Gender: Female **Age:** 16 **Ethnicity:** Hispanic **Bilingual:** No

Educational Level: High School **Marital Status:** Single

Place of Residence: Own family home: 1 or both natural parents
